Education

University of Management and Technology

Bachelor of Software Engineering (BSE)

Lahore, PB
Oct 2022 – 2026

Experience

Full Stack Developer | 2025 – Present

June 2025 – Present

BIG O SOFT

Lahore, PB

- Architected and deployed full-stack applications using React, Node.js, and PostgreSQL on production environments
- Integrated Web3 smart contracts using Ethers.js enabling secure on-chain transactions for end users
- Led performance optimization efforts reducing critical page load times significantly

Full Stack Developer | 2025

Jan 2025 – May 2025

InvoZone

Lahore, PB

- Built responsive UI components using React and Tailwind CSS across multiple features
- Developed and maintained RESTful APIs with Node.js and Express for core backend operations
- Debugged and shipped features alongside senior developers in a production codebase

Software Engineering Intern | 2024

Jul 2024 – Dec 2024

Villaex Technologies

Lahore, PB

- Contributed to frontend (React) and backend (Node.js) features shipped to production
- Debugged and resolved issues across the full stack in a live codebase
- Delivered small features end-to-end, from implementation to testing
- Managed version control via Git through PRs, code reviews, and issue tracking
- Validated feature functionality and performance before production releases
- Navigated and contributed to a large existing codebase within an agile team

Projects

HireMyRoom | React, Node.js, Express, MongoDB, Tailwind CSS

June 2025 – Sep 2025

- Built a full-stack rental platform enabling users to list, browse, and book rooms seamlessly
- Implemented secure authentication and authorization system for managing users and property listings
- Developed RESTful APIs using Node.js and Express for handling bookings and data operations
- End-to-end rental platform with user auth, property listings, booking system and RESTful API fully deployed and functional

Alpha Pulse | TypeScript, Next.js, Tailwind CSS, shadcn, Vercel (Cron Jobs)

Jan 2026 – Present

- Production SaaS dashboard built with Next.js and TypeScript featuring automated
- background jobs via Vercel Cron, reusable shadcn/ui component library, and server-side data handling
- Designed responsive and reusable UI components using shadcn/ui, improving consistency and user experience
- Integrated backend logic and APIs within Next.js, handling data flow, state management, and server-side operations

Technical Skills

Languages : TypeScript, JavaScript, Solidity, SQL (PostgreSQL), HTML/CSS

Frameworks : React.js, Next.js, Node.js, Express.js, Tailwind CSS

Developer Tools : Git, GitHub, Postman, Docker (Basic), Vercel, VS Code

Libraries/ORMs : Prisma, Ethers.js, Web3.js, shadcn/ui
